

Sustainable Produce Container

Patent No. USD951,083

100%
Recyclable!

"I'll pay extra for this packaging!"

"Thank you for doing this!"

*"I hope you replace **ALL** the clamshells here, I'm sick of all this plastic!"*

actual Kroger in-store customer comments

Consumers are fed up with containers they can't recycle and they're tired of billions of plastic clamshells ending up in landfills each year. From mushrooms to microgreens, berries to cherries, the Sustainable Produce Container meets this demand for better packaging:

- 100% recyclable, biodegradable cardboard; Kraft version also certified compostable
- Sizes: Half Pint, Square Pint, Low Profile Pint, 1.5 Pint, Quart, 1.5 Quart, 2 Quart & 3 Quart
- Earth-themed vents provide excellent air flow & product visibility
- Reversible Kraft/white version has high wet strength for temperature transitions
- Easy to hand-form or with fixture, high-speed folding machine available for lease or purchase
- PFAS free, competitively priced against plastic clamshells & punnets in high volumes
- Hinged lid is simple to lock or open, can glue tear tabs to make box tamper proof
- Save warehouse space and freight costs since containers ship flat
- Save retail space since they can stack higher than clamshells, punnets or tills
- Room on the lid for a label or stamp with your story, recipes, or tips on the bottom
- Custom print the entire box and eliminate all nonrecyclable labels
- Recyclable Master Tray holds all container sizes, Small Master Tray also available for smaller sizes
